

# Video logic CONCEPT-K

## MADE IN ITALY

## Videologic CONCEPT-K. True Italian style.

The new design of VCO-K shows the many changes in all technology behind it.

The new style where everything you need has its own place: sensors stored on own battery charger, PC and printer well protected, clamps easily stored away with extra adapters.

A modern and elegant design to fit a unique mix of high-tech of a professional wheel aligner with a perfect Italian design.

## Technologically advanced.

Designed for Windows.XP, Win LOGIC technology runs under Microsoft Windows OS. The user easily controls all functions through Win logic software, with the use of the graphics and icons, and using the wheel aligner is absolutely intuitive.

The PC can be easily upgraded and maintained, as Microsoft Windows is well known by any software technician.

The software can be easily updated: you can always take advantage of our continuous technical developments and make sure your product is never outdated!

## Graphics:

19" SVGA with user-friendly, easy to read and understand, at the same time so detailed to give control all functions on line in very easy way. See here some [Win logic sample screenshots](#).

## Clamps:

The well known [FASEP self centering syncro-clampers](#) with no need for Run-out compensation, with further improvements to allow easy clamping on Alu rims equipped with tires featured with rim protection. The aligner can also be equipped with the newest [Contact clamps](#) where working time can be dramatically reduced.

## Accessories:

a complete set of [accessories](#) to fit all needs and to custom-tailor to get the best performances.
